

# The Vena Growth Engine With Microsoft

## A Powerful Collaboration

For over a decade, Vena has collaborated with Microsoft to empower the strategic office of finance and transform how businesses Plan To Grow, creating the only native Excel Complete Planning Platform built for Microsoft 365 with Power BI Embedded.

Finance, accounting, operations professionals and business leaders use Vena to connect people, departments, processes and systems, and combine financial and operational data to enable actionable insights that align teams and drive agile planning and growth.

## The Power Behind the Plan

### SECURITY AND COMPLIANCE

Get complete auditability, security, transparency and control over your data, completely integrated with the Vena and Excel interface.

### WORKFLOWS

Don't change the way you work. All Vena workflows are synchronized with Excel so you can automate key processes, eliminate bottlenecks, maintain accountability and meet your deadlines.

### INTEGRATIONS

Never compromise your data integrity again. With the language of Excel built directly into Vena, all of your data will stay synchronized and fluid, no matter where it's coming from.

### COLLABORATION

Turn your compartmentalized departments into collaborative business planning partners with the power of Vena and a native Excel interface.

### CENTRAL DATABASE

Work from a single source of truth and never worry about accuracy again by viewing all of your data in Excel first, including imported data from external databases.

### MODELING

See your data from every angle with best-in-class modeling, AI-powered analysis and company-wide business intelligence that empowers real-time data and collaboration capabilities.

## Integrated Across the MS Stack

**Powered by the Vena Growth Engine, Vena Complete Planning is a secure, easy-to-use and collaborative cloud-based CPM platform that:**

- Automates key processes and synchronizes workflows with Excel
- Powers best-in-class and multidimensional modeling, AI-powered analysis and company-wide business intelligence that enables real-time data and collaboration capabilities
- Streamlines FP&A, extended planning and any complex, spreadsheet-powered business process
- Integrates with multiple source systems to connect data from across the business
- Provides complete auditability, transparency and control over your data
- Seamless integration across the Microsoft stack - Excel, Power BI, Microsoft 365 and Power Automate

### Microsoft Excel

Vena Complete Planning leverages a native Excel interface that combines Excel's unmatched flexibility with an intuitive and controlled application environment, empowering you to store, edit, share, model and analyze the data that drives your business your way with uncompromised data integrity.

### Microsoft Power BI

Drive strategic business planning and up-to-the-minute analysis with Power BI, Microsoft's market-leading business intelligence tool, embedded in Vena Complete Planning. Leverage your Vena data to create and collaborate on interactive data visualizations and dashboards, and share deep and scalable insights across your organization with of-the-box and guided business intelligence for all.

### Microsoft 365

Vena's certified Microsoft 365 integration provides users with a fast and secure installation and enhanced user experience in a platform-agnostic environment so users can plan with confidence from anywhere at any time. Power your Plan To Grow with high usability, ease-of-use and rapid adoption across your business.

### Microsoft Power Automate

Integrate across hundreds of data sources in the Power Automate Library. Vena translates your raw data into actionable insights and reports via Power Automate.
